

Sprint #2 Report
Product Name: Slugging
Team Name: Carpool Tunnel
Date: 11/4/2015

Actions to stop doing:

- I. Over calculating our estimated hours for stories. The burn-up chart estimated hours are not accurate because we are over estimated the amount of hours necessary to complete a task.
- II. Do not calculate tasks over 21 hours. Tasks greater than 21 hours should be broken up.

Actions to start doing:

- I. Accurately calculate the estimated hours for each story so that the burn up chart is closer to our actual hours. Although the trend shows the completion of the stories, the hours are misleading. This includes not calculated tasks greater than 21 hours.
- II. Keep the other teams UI decisions in mind when designing new features
- III. More group coding to ensure the controllers behave as intended by all team members
- IV. Complete more sprint stories that were allocated for the according sprint

Actions to keep doing:

- I. Keep the rate of production
- II. Keep the communication between both teams
- III. Having effective scrum meetings
- IV. Having bursts of productivity

Work completed/not completed

Work completed:

User Story 0: As a user of the system, I must be able to read a user manual of the {product name}.

User Story 1: As a driver, I want to be able to delete my route, so that I don't need to drive the same route every quarter/year. (Android)

User Story 2: As a driver, I want to be notified when a passenger has requested to join my carpool, so that I can determine if I would like to accept them for my carpool.(Android, iOS)

User Story 3: As a driver, I want to send notification to my passengers, so that they know I've accepted their request.(Android)

User Story 5: As a user, I need to be able to cancel a request, so that the other person knows.(Android)

User Story 6: As a user, I need to be able to view my rides or pickups, so that I don't forget.(Android, iOS)

User Story 7: As a driver, I want to send a reminder to my passengers asking if they want their ride today, so that I can avoid waiting for people that have a change of plans.

(Android)

User Story 8: As a passenger, I need to be able to view all carpool routes to choose the closest route. (iOS from Sprint 1)

User Story 9: As a driver, I want to post my driving schedule for the week, so that other passengers can determine if they want to carpool at the same times. (iOS from Sprint 1)

Work not completed:

User Story 1: As a driver, I want to be able to delete my route, so that I don't need to drive the same route every quarter/year. (iOS)

User Story 5: As a user, I need to be able to cancel a request, so that the other person knows. (iOS)
