Sprint #3 Report
Product Name: Slugging
Team Name: Carpool Tunnel
Date: 12/1/2015

Actions to stop doing:
I.   Putting in User Stories that essentially want the same thing. This causes expected hours to become inaccurate.

Actions to start doing:
I.   Determine what we actually want to accomplish so we don't put stories into backlog.

Actions to keep doing:
I.   Keep the rate of production
II.   Keep the communication between both teams
III.   Having effective scrum meetings
IV.   Having bursts of productivity

Work completed/not completed:
Work completed:

ANDROID :

User story 3: As a passenger I want to be able to see my driver's profile when selecting my route so that I can see their information.
User story 5: As a tester, I need to run regression tests so that I can discover new software bugs.
User story 6: As a user, I want a beautiful UI so the app is aesthetically pleasing.
User story 7: As a user I want to be able to view a user manual/tutorial so that I can understand how the app works.

iOS:

User story 3: As a passenger I want to be able to see my driver's profile when selecting my route so that I can see their information.
User story 5: As a tester, I need to run regression tests so that I can discover new software bugs.
User story 6: As a user, I want a beautiful UI so the app is aesthetically pleasing.
User story 7: As a user I want to be able to view a user manual/tutorial so that I can understand how the app works.
User Story 8: As a driver, I want to be able to delete my route, so that I don't need to drive the same route every quarter/year.
User Story 9: As a driver, I want to post my driving schedule for the week, so that other passengers can determine if they want to carpool at the same times.
User Story 10: As a passenger, I need to be able to view all carpool routes to choose the closest route.
User Story 11: As a driver, I want to send notification to my passengers, so that they know I've accepted their request.
User Story 12: As a driver, I want to be notified when a passenger has requested to join my carpool, so that I can determine if I would like to accept them for my carpool.

User Story 13: As a user, I need to be able to cancel a request, so that the other person knows.
User Story 14: As a driver, I want to send a reminder to my passengers asking if the want their ride today, so that I can avoid waiting for people that have a change of plans.

Work not completed:

ANDROID:

User story 1: As a driver, I want to be able to view the status/userscore of the requesting passenger so that I can determine if I want to accept the request if the user is a good passenger.
User story 2: As a user, I need to be able to rate other people so that their reputability is known to others
User story 4: As a driver I want to send notifications to my passengers that I am leaving in x minutes so that my passengers are ready when I arrive.

iOS:

User story 1: As a driver, I want to be able to view the status/userscore of the requesting passenger so that I can determine if I want to accept the request if the user is a good passenger.
User story 2: As a user, I need to be able to rate other people so that their reputability is known to others
User story 4: As a driver I want to send notifications to my passengers that I am leaving in x minutes so that my passengers are ready when I arrive.

Work completion rate:
Total number of user stories completed:
      4 user stories completed for Android
      11 user stories completed for iOS
      1 User Documentation story completed
Total number estimated ideal work hours completed during prior sprint: # 99/150 Ideal Hours
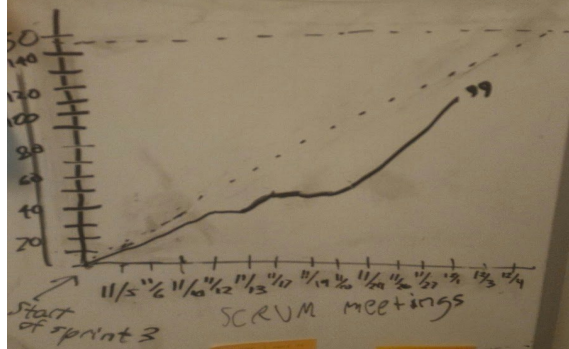

Total number of days: 29
User Stories per day: 0.138 Android, 0.379 iOS
Ideal work hours per day: 3.41
